

Bring Hands-On STEM Learning to Your Community

RISE to offers free, engaging STEM workshops for students between 8 and 13

What is RISE?

RISE (Reinventing, Innovation, STEM, and Education) is a student-run organization dedicated to empowering youths by giving students free access to STEM education. We will create and lead workshops that make STEM accessible, fun, and meaningful to all students of any background, no prior experience necessary.

What Have We Done in the Past?

We have led 6 classes focusing on engineering at the Agape Youth & Family Center. During this program, students learned various engineering disciplines including mechanical, civil, aerospace, chemical, and more while applying their skills in fun projects. Join our workshops for a similar experience!

What We Offer

- **Free STEM workshops** designed for elementary and middle school students
- Workshop projects include:
 - Code Your Own Game
 - Ice Cream Lab
 - Bridge Competition
 - And More!
- Friendly, experienced high school instructors trained to guide and support
- Flexible workshop formats

What We Ask From You

- Any indoor space for 8–20 students, such as a classroom or library
- Tables and chairs
- Access to power outlets
- Support in sharing signups with families/community (e.g., bulletin board)
- Optional: Wi-Fi access

We'll handle everything else, including supplies, teaching, and setup.

Why Partner with RISE?

- High-quality STEM programming with no staff or budget requirements
- Attract and engage youth in meaningful educational experiences
- Supports equity in STEM access

Let's Talk!

We'd love to bring a RISE Workshop to your community.
